The shift to a remote workforce has made business continuity more important. Keeping users connected, productive and secure without losing the agility and reliability needed to scale to support evolving demands.

Up to 75 million U.S. employees could work remotely.*

According to a recent Gartner CFO survey, nearly a quarter of respondents said they will move at least 20% of their on-site employees to permanent remote positions.**

62% of employed Americans currently say they have worked from home during the crisis, a number that has doubled since mid-March.***
